

Take your business to the next level with Clover™ Station.

The TransArmor® Solution works with most point-of-sale terminals and merchant payment systems. And, if you purchase a Clover™ Station, TransArmor Data Protection is already included.

Back up your sales data. TransArmor Data Protection and Clover Station work together to secure your sales data in a remote server. This lets you recover vital business information if you lose access due to fire, theft or damage.

Simplify daily transactions. In addition to protecting your payment data, Clover Station lets you track inventory, manage employees, build stronger customer relationships and accept payments with ease.

Grow your business your way. You can easily enhance your Clover Station with apps from the ever-expanding Clover™ App Market. This flexibility ensures that it can evolve with your business for years to come.

Focus on your business, not your security.

Count on TransArmor® Solution for one of the industry's most comprehensive processing security packages, and run your business with confidence.

TransArmor® Solution Protect your success.

Introducing the expanded TransArmor® Solution.

Security threats are a fact of life for businesses that accept credit or debit card payments. There's strong protection available—but even the best security won't work if it's too complicated to use. That's why the new TransArmor® Solution was made to be both incredibly powerful and easy to manage. We'll help you stay safe with the latest security measures, freeing you to focus on running your business.

Get the payment security experts on your side.

"Don't breaches only happen to big brands?"

For a hacker, a small business can be a big target. In fact, 90% of all data breaches impact small merchants.¹

"I wouldn't be liable, right?"

The cost of one data breach could exceed \$50,000², and you very well could be liable for the cost.

We've all read the headlines. Now, it's time to take action to help secure your business.

"I'm pretty sure I'm already protected."

Now is the time to be certain that you have the security you need to minimize your risk.

Multilayered protection for businesses just like yours.

The TransArmor® Solution is a state-of-the-art security package that helps protect you from hackers and malicious software. It defends your system from cyberattacks, safeguards your customers' data and reduces your business' liability in the event of a breach. And now, it's a standard feature of our merchant accounts.

PROTECT YOUR CUSTOMERS

- Make it virtually impossible for cyber criminals to steal card data.*
- Comprehensively monitor the security of your POS system.
- Equip your business to accept new EMV™ chip-based cards.*

REDUCE YOUR PCI COMPLIANCE BURDEN

- Assess your compliance levels with a fast and easy questionnaire.
- Receive alerts about possible tampering of your POS system.
- Get an at-a-glance look at your overall data security and risk outlook.

MINIMIZE YOUR LIABILITIES

- In the event of a data breach, get a liability waiver of up to \$100,000 for card association fines and expenses.

GET EXPERT GUIDANCE

- Contact our dedicated specialists about any security questions or concerns.
